

MOD Display Solutions and Services

MOD Company History

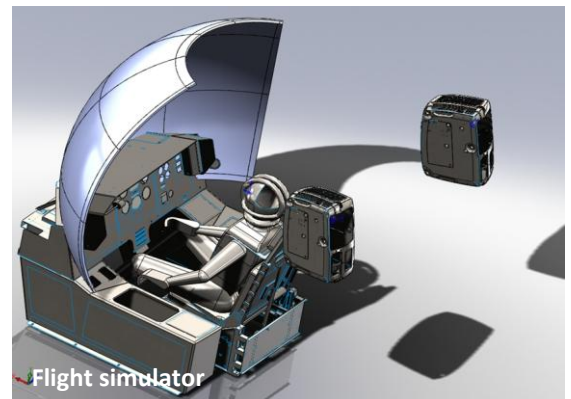

Back in 1999 we have started to develop products for Philips in Vienna. Our initial project focused on the development of the RGB alignment station for the alignment of a 3 LCD projector light engine.

Since then MOD has moved into the development of mechanical optical devices – such as projectors and 3 CCD cameras. In the meantime MOD is a well known company, in several areas in the design and manufacturing of projecting systems, which are sold worldwide.

MOD is currently employing 22 people – the majority working in R&D and engineering.

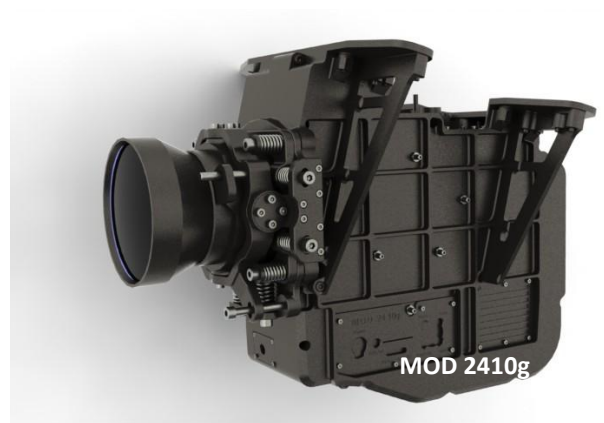

Services

- Configuration of **display systems** for custom applications
- Optical, thermal and mechanical **design**
- System assembly, calibration and warping of **visual systems**
- Consulting and selection of appropriate Image Generators for **night vision** Systems

Products/Developments

- Night vision projector **LEDIR 24**
- Night Vision Module - **High Dynamic Flux Light Source**
- Pilot **training system** -
Display system installed in a centrifuge up to 10 g acceleration
- **Cave System**
3 x (3 or 6) x 3 m optional four to five virtual planes
- **Dome Systems** with multiple projectors
- **Collimated Displays**
- **Direct View Displays**
